SUSTITUCION DE LA VALVULA X062100 POR LA X012119

vsezip.ru

+7(812)987-08-81

La pieza **A** que va situada en la pared de la cuba para introducir el capilar del termostato se debe eliminar.

Al sustituir la válvula antigua por la nueva, en el orificio de la cuba se introducirá el bulbo **B** de la nueva válvula, quedando encajado en el orificio de la cuba y amarrado mediante la junta **J** y la tuerca **N**.

El funcionamiento de las dos válvulas es idéntico.
