Wiring diagram for a 120V electric range. The diagram shows the following components and their connections:

- Motor Pump:** Connected to the main power line through a switch.
- Hi Temp Cutoff Switch:** Connected to the main power line through a switch.
- Switch Master:** Connected to the main power line through a switch.
- Switch Comp:** Connected to the main power line through a switch.
- Junction Box:** A central point for connecting the main power line to the range's internal wiring.
- Terminal Box:** Contains the compressor motor, internal protector, and various control components.
- Hi-Pressure Control:** A safety device connected to the main power line.
- Contactor:** A switch that controls the flow of electricity to the compressor motor.
- Relay:** A device that controls the flow of electricity to the compressor motor.
- Bimetallic Thermostat:** A temperature-sensing device connected to the main power line.

Internal Protector details:

- Motor:** The main component of the internal protector.
- Terminal Box:** Contains the internal protector, internal protector, and various control components.
- Internal Protector:** A safety device that prevents the compressor motor from overheating.

THIS UNIT MUST BE GROUNDED.
